SUMMARY

Seasoned professional with 7+ years of experience in architecting and managing robust backend systems using PHP, Laravel, and modern frameworks. Expertise in leading development teams, driving technical strategies, and delivering high-performance solutions for complex, high-demand platforms. Proficient in API integration (Twilio, PayPal, FedEx), advanced queue management, and performance optimization. Adept at transforming business requirements into scalable, innovative solutions for global clients.

EXPERIENCE

Technical Lead | Backend Development

Gandom · Full-time

- 01/2023 - Present
- Led technical discussions and project analysis, collaborating with management to define solutions for Canadian clients.
 - Managed a development team, creating tasks in Jira, and providing technical guidance for successful project execution.
 - Developed a comprehensive SMS panel with features like bulk messaging, smart automation, and integration with Twilio and Bandwidth.
 - Implemented advanced queue management and scheduling systems for critical operations.
 - Worked on VoIP projects using GraphQL, focusing on seamless integration and performance.
 - Integrated payment gateways (e.g., PayPal) and logistics APIs (FedEx, UPS) to enhance platform functionality.
 - Integrated telecommunication features using Twilio and Bandwidth for diverse client projects.

Backend Developer | Laravel & Vue.js Specialist

Maksab · Full-time

- 01/2022 - 01/2023
- Developed and maintained scalable backend systems using Laravel 8 & 9 for innovative platforms tailored to the Palestinian market.
 - Designed and implemented RESTful APIs for seamless communication between frontend and backend, focusing on performance and security.
 - Built responsive admin panels with Vue.js for efficient platform management.
 - Worked on marketplace applications and custom platforms, addressing unique regional needs.
 - Implemented caching systems to improve performance in areas with poor internet connectivity, reducing load times and server strain.
 - Collaborated with design and frontend teams to ensure seamless integration of the admin panel.
 - Optimized APIs for high-traffic use and ensured robust security measures.
 - Contributed to application deployment, maintenance, and ongoing support.

PHP Developer | Financial Plugin Developer

Sepidar System · Full-time

- 01/2021 - 01/2022
- Developed and maintained a WooCommerce financial plugin for seamless synchronization with Sepidar's accounting software.
 - Collaborated with teams to add new features and improve plugin stability and performance.
 - Optimized data synchronization to handle large transaction volumes efficiently.
 - Provided technical support and resolved issues to ensure customer satisfaction.
 - Contributed to the documentation and deployment process for clients.

Full-Stack Developer (Laravel & Livewire)

Business Growth Agency (AGTeam) · Full-time

- 01/2019 - 01/2021
- Designed and developed websites using Laravel 6 & 7, handling both backend and frontend tasks.
 - Built scalable and maintainable backend systems for e-commerce platforms, corporate websites, blogs, and single-page applications.
 - Implemented responsive and user-friendly interfaces using Blade and Livewire.
 - Deployed websites with custom features to meet specific business requirements.
 - Optimized website performance and ensured high availability in collaboration with the team.
 - Managed end-to-end development for multiple projects, including frontend and backend.

SKILLS

Database Design & Optimization		RabbitMQ	
Microservices	Test-Driven Development		
Team Leadership	Project Management		
API Integration	Caching Systems		
RESTful API Development			
Project Analysis & Planning			
Queue Management & Scheduling			Jira
GraphQL	Laravel	Mysql	Php
Automation Systems			
API Performance Optimization			Livewire
Nuxt.js			

EDUCATION

Bachelor's Degree in Software Engineering

Islamic Azad University

- 01/2019 - 01/2023
- Member of the university's growth initiative, leading the development of its growth platform.
 - Winner of first place in a startup competition and participant in several others.
 - Contributed to various software development projects, focusing on web development and backend systems.
 - Actively participated in coding workshops and tech events organized by the university.
